

APPROVED PRODUCTS

The products in the table below meet the criteria for claims against emerging viral pathogens and therefore can be used against 2019 Novel Coronavirus when used in accordance with the directions for use against the listed supporting virus on hard, non-porous surfaces.

Allocation Disclaimer: Due to increased demand, certain products are being placed on allocation to ensure we are able to get some product to the largest number of customers.

▶ HARD SURFACE SANITIZERS & DISINFECTANTS

PRODUCT NAME	PRODUCT SIZE	PRODUCT CODE	NAME OF SUPPORTING, VIRUS, DILUTION RATE AND CONTACT TIME

*BOOST 3201 by itself does not have an emerging pathogen claim.

**May need to reapply to keep wet for the extended contact time.

Follow your existing cleaning & sanitizing processes. Should there be a need to do a viricidal disinfection, follow the concentration and time listed in the table above for the product. Follow this with the normal cleaning & sanitizing program to remove any residues that might be left from the viricidal disinfection.

The CDC recommends washing your hands with soap and water for at least 20 seconds. If soap and water are not available, the CDC recommends using a hand sanitizer that contains at least 60% alcohol.¹ While Ecocare 360 contains less than 60% alcohol, it may provide some benefit if soap and water are not available.

* Ecolab recommends ancillary products. Any hand pump used with the 55-gal Hand Sanitizer Alcohol Antiseptic 80% Topical Solution must be made of stainless steel. See SDS for safety considerations. Ecolab has identified vendors from which to purchase ancillary products. Please consult your Ecolab representative for details.
